Operating model: Online / delivery-based

“Shop Smart. Live Better.”

1. About Express Convenience

Express Convenience is an e-commerce business focused on making everyday shopping easier through online ordering and doorstep delivery. Rather than relying on a traditional walk-in store model, the business is designed around digital access: customers browse products, place orders online, choose a convenient payment method and arrange delivery to their location.

The business is being developed as a practical, customer-first shopping platform. Its goal is to reduce the time and effort involved in purchasing everyday products while creating a simple digital experience that can grow with customer demand.

2. Our Mission

To make everyday shopping more convenient by connecting customers with products through a simple e-commerce platform, flexible payment options and reliable doorstep delivery.

3. Our Vision

To develop Express Convenience into a trusted, accessible and technology-enabled e-commerce and delivery service that serves customers wherever convenient shopping is needed.

4. Core Values

CONVENIENCE	Make shopping easier and reduce unnecessary effort.
CUSTOMER FOCUS	Build around real customer needs, feedback and accessibility.
RELIABILITY	Deliver a dependable ordering and delivery experience.
ACCESSIBILITY	Give customers practical ways to shop and pay digitally.
INNOVATION	Continuously improve the website, ordering process and services.
INTEGRITY	Communicate clearly and handle customer orders responsibly.

5. Products & Services

Express Convenience is intended to provide a broad range of everyday products through its online shopping platform. Product categories can expand as the business develops its supplier network and customer base.

Everyday groceries	Staple foods, drinks, snacks and household shopping needs.
Household essentials	Practical products for everyday home use.
Personal care	Selected personal and convenience products.
Health & OTC products	Where legally appropriate, selected over-the-counter products.
Other convenience products	Additional products introduced according to customer demand.

6. How the Customer Experience Works

01	Browse Customer visits the Express Convenience website and views available products.
02	Select Customer chooses products and adds them to the order/cart.
03	Checkout Customer confirms the order and delivery details.
04	Pay Customer selects a supported payment method. Wallet-transfer payment is part of the planned easy-payment experience.
05	Prepare Express Convenience confirms the order and prepares the products for dispatch.
06	Deliver The order is delivered to the customer's specified location.

7. Digital Payments & Website Development

A major part of the Express Convenience concept is making payment as simple as the shopping experience. The website is being developed further to support a clear and convenient checkout process, including wallet-transfer payment functionality.

Planned wallet-transfer payment flow

- 1. Choose payment** — At checkout, the customer selects the wallet-transfer/easy-payment option.
- 2. Payment instructions** — The website provides the required payment information and instructions.
- 3. Upload proof** — The customer can upload payment confirmation/proof through the website.
- 4. Order verification** — Express Convenience verifies the payment against the order.
- 5. Order processing** — Once confirmed, the order moves forward for preparation and delivery.

Important: The payment workflow described above represents the intended website development direction. Final payment-provider integration, verification procedures and technical requirements should be confirmed with the relevant payment provider before launch.

Website Development Roadmap

Stage 1	Core online store	Product catalogue, product details, prices and ordering.
Stage 2	Checkout	Customer details, delivery information and order confirmation.
Stage 3	Easy payments	Wallet-transfer option, payment instructions and proof upload.
Stage 4	Order management	Internal order confirmation, payment verification and status updates.
Stage 5	Delivery operations	Delivery assignment, customer communication and completion tracking.
Stage 6	Growth	Promotions, customer accounts, repeat orders, analytics and additional integrations.

8. What Makes Express Convenience Different

- **Digital-first:** Customers can access the business online rather than needing to visit a physical shop.
- **Doorstep convenience:** The service is built around delivering purchased items directly to customers.
- **Easy payments:** The platform is being developed with practical digital payment options, including wallet transfers.
- **Customer-centred development:** The website and service can evolve around customer feedback and real shopping needs.
- **Convenience beyond products:** Express Convenience aims to combine product access, payment and delivery into one simple journey.

9. Operating Model

Express Convenience operates as an online retail and delivery service. The customer-facing platform is the website, while fulfilment and delivery activities are coordinated behind the scenes. This model allows the business to focus on digital accessibility, product availability, order processing and customer service without positioning a walk-in retail store as the core model.

10. Customer Promise

Express Convenience aims to make shopping simple, accessible and convenient: find what you need online, place your order, use a convenient payment method and have your purchase delivered.
